Sandes Savarimuthu

FULL STACK DEVELOPER

6-month internship, starting late March 2027

Paris · dulnakasandes16@gmail.com · linkedin.com/in/sandes-savarimuthu · github.com/Landry-16 · sandess.dev

Full stack developer in my third year at Epitech Paris. **2 company internships** (Danone, AP-HP), freelance work building client websites from mock-up to launch, and **7 projects shown** on my portfolio, including a desktop app in Tauri, React and Rust. I am looking for a 6-month internship starting late March 2027 to work on web products within a team.

EXPERIENCE

Freelance web developer · Self-employed, Paris — Since 2026

- Showcase websites for local businesses: quote, custom or template-based mock-up, hand-over of the code and user guide, then hosting and maintenance.
- Websites with no cookie banner, live opening hours and generated legal notices.
- Built P-Finder, an in-house tool for prospecting, quotes and client project tracking.

Technical and teaching assistant · Epitech Paris — Since March 2026

- Technical follow-up of first and second year students' projects in C, C++ and Python.
- Project reviews and running project defences.

Software developer intern · Danone — Sept. to Dec. 2025

- ABAP development and MuleSoft integration on real projects.
- Generative AI in Python and process automation with Power Platform.

Intern, IT team · AP-HP, Robert-Debré hospital — July to Sept. 2025

- Automation of management tasks in Active Directory.
- Designed and built inventory and IT asset management tools.

PROJECTS

Dreamlee, an all-in-one writing desk — In progress

Tauri 2 · React · Rust

From the first idea to the exported manuscript: a desktop app for authors.

Dreamlee, launch page — Website

Astro · TypeScript · Playwright

A launch page where an author's desk tidies itself up as you scroll.

Nacre, website of an independent web studio — Website

Astro · TypeScript · GSAP

Replays the making of a client website as you scroll and builds the quote live.

Nocturne at the Petit Palais — 3D

TypeScript · Three.js · WebGL

A night-time 3D tour of four rooms and twelve paintings, driven by scrolling.

Maison Écaille — Website

Astro · TypeScript · GSAP

An immersive perfume page where a snake crosses the site as you scroll.

Path tracer — Renderer

C++17 · CMake · SFML · TypeScript · WebGL2

A physically based renderer with two integrators, a BVH and plugins loaded at runtime. Its WebGL2 version lights up the home page of my portfolio.

EDUCATION

Epitech Paris

Programme Grande École (Master's level) · 2024 to 2029 · currently in 3rd year

Team project-based learning: systems programming in C, object-oriented C++, networking, algorithms, web and artificial intelligence.
